Surgical Results
Without the Scars

THE MOST ADVANCED FACIAL CONTOURING & REFINEMENT PROCEDURE

" My skin has not felt this firm since I was a single woman in my twenties. There was little to no discomfort and I was back to my normal activities the next day."

J. S. - PATIENT

One Procedure. Significant, Long-Lasting Results.

WHAT AREAS CAN BE TREATED?

Any areas on the face and neck with saggy skin can be treated. This includes the double chin, jowl line as well as other areas with deep lines and loose skin.

WHAT KIND OF PROCEDURE CARE IS REQUIRED?

FaceTite is a minimally-invasive procedure performed under local anesthesia or light sedation. Post procedure, patient can go home and resume regular activities shortly after. Wearing a compression garment is required for best results.

WHAT IS FACETITE?

FaceTite provides dramatic improvement in skin laxity on the face and neck, which was previously only attainable through a surgical procedure such as a facelift. FaceTite utilizes minimally invasive radio-frequency energy to melt fat and tighten skin.

HOW IS THIS BETTER THAN A FACELIFT?

By avoiding a facelift excisional procedure, patients will be scar free and will benefit from reduced post-procedural swelling and discomfort. This is a less traumatic process with a natural looking final result.

HOW QUICKLY WILL I SEE RESULTS?

Results can be seen immediately, with best results noticeable after 6-12 weeks.

Please speak to your aesthetic provider to see if FaceTite is right for you.
